

## Position Opening Engineering Internship/ Co-Op Program

North Star BlueScope Steel is a \$1 billion dollar joint venture between Cargill Inc, and BlueScope Steel, located in Delta, Ohio. North Star BlueScope Steel is proving to be a leader in the hot-rolled steel manufacturing industry. The successful candidate will be a member of one of the most technologically advanced Mini-Mill Steel Producing facilities in the world. In our 15 years of production we have established industry benchmarks for Safety, Productivity, Quality and Delivery Performance.

North Star BlueScope Steel has an internship for a junior/ senior engineering student. The student would work full time within our Maintenance Departments on a variety of project related tasks over the spring, summer or fall months. The successful student must be willing to get hands on learning experience.

All applicants applying should be approaching their junior or senior year of Electrical, Mechanical, or Metallurgical Engineering.

Key Competences for this position include:

- Action oriented
- Demonstrated problem solving abilities
- Well organized
- Strong grades in engineering related subjects
- Quick learner
- Results driven
- Very good team skills / interpersonal skills
- Strong communication skills

The applicant will attract a competitive market salary, working 40 hours per week plus overtime when necessary. Hired applicants will qualify for a short time living allowance. Internship/Co-op opportunities will be offered in the spring, summer, and fall of 2015.
